

TETRAFLUOROETHYLENE THERMOPROCESSABLE COPOLYMER  
MICROSPHERES

ABSTRACT

Tetrafluoroethylene (TFE) thermoprocessable copolymer microspheres having a substantially spherical shape for at least 95% by weight, the average size of the microspheres being in the range 25  $\mu\text{m}$  and 2 mm, the bulk density being in the range 0.5 and 1.1  $\text{g}/\text{cm}^3$ .
